Steve,

I have not had time to compile training materials for Andrew but I am running PFAS media samples all next week. This work is on LC-triple quad-MS and similar to what is done for your projects and would be a good opportunity for Andrew to read about, observe, and discuss some hard-core analytical chemistry work from prep to data analysis. Attached is the project plan, OP, experiment plan, and supporting calculations in Excel.

Adam

Hi Adam-

I know you're probably swamped, but I was wondering if you had ~30 minutes today or tomorrow to meet Andrew Eicher, the new student contractor we brought in to help with LC-MS work? He is anxious to meet you guys, see the lab and talk about a training schedule.

Thanks

steve
